DC/DC Module Power Supply IB_XT-1WR2 series

MORNSUN®

1W, Fixed input voltage , isolated & regulated single FEATURES output

Patent Protection RoHS

- Continuous short circuit protection
- Efficiency up to 75%
- Operating temperature range: -40°C to +85°C
- Isolation voltage: 1.5K VDC
- Miniature SMD package
- No external component required
- International standard pin-out

IB_XT-1WR2 series is specially designed for applications where an isolated voltage is required in a distributed power supply system. It is suitable

- 1. Where the voltage of the input power supply is stable (voltage variation: $\pm 5\%$ Vin);
- 2. Where isolation is necessary between input and output (isolation voltage ≤1500VDC);
- 3. Where has high requirement of line regulation and load regulation.

Design Reference

1. Typical application

If it is required to further reduce input and output ripple, a filter capacitor can be connected to the input and output terminals, see Fig.2. Moreover, choosing suitable filter capacitor is very important, start-up problems may be caused by too large capacitance. To ensured the modules running well, the recommended capacitive load values as shown in Table 1.

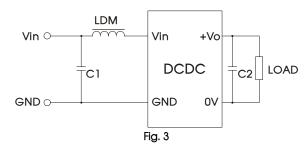

Recommended capacitive load value table (Table 1)

Vin(VDC)	Cin(µF)	Vo (VDC)	Cout(µF)
5	4.7	3.3/5	10
12	2.2	12	2.2
24	1	15	1

It is not recommended to connect any external capacitor when output power is less than 0.5W.

2. EMC typical recommended circuit

Input	voltage (V)	5/12/24
	C1	4.7µF /50V
EMI	C2	Refer to the Cout in Fig.2
	LDM	6.8µH

Note: It is not needed to add the component in the peripheral circuit when parameter with the symbol of "--"

3. Output load requirements

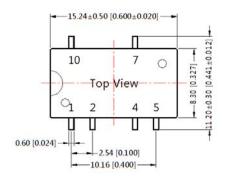

To ensure the module work efficiently and reliably, during the operation, the min. output load should be no less than 10% of the full load. If the actual output power is low, please connect a resister to the output terminal in parallel, with a recommenced resistance which is 10% of the rated power, and derating is required during operation.

Notes:

- 1. Packing Information please refer to 'Product Packing Information'. Packing bag number: 58210023;
- 2. If the product is operated under the min. required load, the product performance cannot be guaranteed to comply with all performance indexes in this datasheet;
- The max. capacitive load should be tested within the input voltage range and under full load conditions;
- Unless otherwise specified, data in this data sheet should be tested under the conditions of Ta=25°C, humidity<75% when inputting nominal voltage and outputting rated load;
- 5. All index testing methods in this datasheet are based on our Company's corporate standards;
- 6. The performance indexes of the product models listed in this manual are as above, but some indexes of non-standard model products will exceed the above-mentioned requirements, and please directly contact our technicians for specific information;
- 7. We can provide product customization service;
- 8. Specifications of this product are subject to changes without prior notice.
